2019 Report Card on Canadian Early Hearing Detection and Intervention Programs

This report card has been developed by the Canadian Infant Hearing Task Force (CIHTF), a collaboration between Speech-Language & Audiology Canada (SAC) and the Canadian Academy of Audiology (CAA).

<p>TERRITORY</p>	<p>Yukon</p> 
<p>EHDI GRADE</p>	<p>SUFFICIENT</p>
<p>DESCRIPTORS</p>	<ul style="list-style-type: none"> • 99%+ babies screened • All EHDI components available with support from southern provinces (e.g., BC) • Clinical protocols are implemented and monitored • Database tracks infants and outcomes
<p>RECOMMENDATIONS</p>	<ul style="list-style-type: none"> • Continued commitment to and investment in a coordinated and comprehensive EHDI program territory-wide that is supported by a data management system • Continued attention on program quality improvement and sustainability

Early Hearing Detection and Intervention (EHDI) programs aim to proactively address infant hearing health and include the following components: **1) universal hearing screening of all newborns; 2) identification of babies with permanent hearing loss; 3) intervention services which include support for technology and communication development; 4) family support; and 5) monitoring and evaluation of the program.**

Grades were assigned based on all five of the components being available province or territory-wide.

CANADA'S GRADE: INSUFFICIENT
